5 years prison
possible for energy theft

CASE STUDY

£50,000
fine

+ prison for
London man
damaging
power supply
to over 15,000
homes

All incidences reported on this infographic have previously been reported in the UK media. The link between energy theft and personal injury or damage to property can be hard to prove due to the severe damage that electrical fires and gas explosions can cause. Links to the original information sources are listed on our website at stayenergysafe.co.uk/links
