

Your fire escape plan

Fire can spread rapidly, leaving you less than two minutes to escape your home safely once the fire alarm sounds.

Plan two exit routes from your home. Decide on a safe place to meet outside, away from the building.

Keep exits clear at all times. Can everyone easily open the windows if needed?

Practice makes perfect. Test your plan at least twice a year and get everyone involved – including young children and dependents.

If your home does catch fire:

- Don't delay
- Call 999 immediately
- Stay low, get out and stay out
- Don't tackle the fire yourself
- If clothes catch on fire - STOP, DROP and ROLL
